

Entomology County Wide Project

Have you chased butterflies or caught a ladybug to get a closer look?

Do you think collecting bugs is a great way to spend time with nature? Then the 4-H Entomology project is for you. Learn about the world of insects in soil, on plants, in homes, on pets, and other secret places!

Some of the things you will learn/do in the project:

- Learn the main parts of an insect
- Collect, pin, label, and exhibit an insect collection
- Learn about insects and their role in our environment
- Learn about insect behavior
- Amaze your friends with your knowledge!

There is a county wide entomology meeting once a month for all 4-H members (from any 4-H Club) enrolled in the project. It is usually held at 7pm on the third Thursday of the month at the Sedgwick County Extension Education Center.

County wide activities include:

- Field trips to collect bugs. We love traipsing through fields and wading through creeks to catch bugs that most people don't even know are there!
- Insect races – Each fall we have our insect races, followed by a pizza party.
- Parents vs. 4-Hers Quiz Bowl
- “Buggy” games at each meeting make learning about insects fun!

Members who participate in the monthly entomology meetings will receive email updates and information.
